

METADATA INSTRUCTIONS

Things to do before you are able to submit metadata:

Create a Collection in the PARADISEC archive (see [BECOMING A PARADISEC USER AND DEPOSITOR](#), [GETTING STARTED WITH PARADISEC](#))

Organise your files to determine how many items you need to create in your collection catalog. For example, an item can be understood to be a recording event. All files associated with that event (.mts, .wav, .eaf, etc.) can be archived under that item (see [GETTING STARTED WITH PARADISEC](#))

Name your files, following PARADISEC naming conventions: [FILE NAMING FOR PARADISEC ARCHIVING](#)

Metadata records contain descriptions or attributes about a given resource. Essentially, metadata answers questions such as *WHO*, *WHAT*, *WHEN*, *WHERE*, *HOW* and *WHY* about your files. This information will help you and other researchers find your materials. The more details you provide, the easier that process will be. PARADISEC offers 3 methods for you to add metadata to the catalog. This guide offers a brief overview of two of them, with links to follow-up on a third option (ExSite9) should you choose to do so.

MINIMAL METADATA SHEET

The Minimal Metadata Sheet allows you to create a bulk set of items for your collection, requiring very few mandatory fields. It is the easiest and fastest way to populate your collection with items. As you can see in the image of the spreadsheet, there is a small number of fields to fill in: 4 fields to describe your collection, 7 fields for each item. **NOTE:** *In order for the batch upload of metadata to work, you must not change the structure of the spreadsheet.*

Item Identifier (e.g. 1995Elders)	Item Title (e.g. Introductory Materials)	Item Description (e.g. Four text stories for interviews)	Content Language (Language as spoken in file, only ISO-639-3 names here please, and separate more than one language name with)	Subject Language (Language discussed, only ISO-639-3 names here please, and separate more than one language name with)	Country/Countries (separate more than one country name with)	Origination Date (when the item finished being created (YYYY-MM-DD))
<p>1 First enter minimal collection details at the top, then enter one line per item in the table below.</p> <p>2 Only fill in the light yellow fields. DO NOT CHANGE the structure of this spreadsheet!!!!</p>						
Collection ID (e.g. LB08):	JCM01					
Collection Title (e.g. Recordings of Salako):	Recordings from Bimadbn Village, Western Province, PNG					
Collection Description (e.g. Tribe history recounted by elders):	This collection contains personal narratives, sociolinguistic interviews, word lists for phonetic analysis, and ethno-ornithological information					
Collector (e.g. Linda Barwick):	Julia, Miller					
<p>11 Add one row per item. Add more rows to add more items.</p>						
20150910_01	Recording from early morning bird walk	These recordings include isolated birdsongs, collected with a shotgun microphone and ethno-ornithological commentary from a speaker using a head-mounted microphone. Sociolinguistic interviews conducted on this date in Bimadin Village. The tracks and speaker codes are listed below: 01:25M 02:37F 03:88F	Nen English	Nen	Papua New Guinea	2015-09-10
20150910_02	Sociolinguistic interview	Used the Southern New Guinea comparative word list. Speaker wore a head-mounted microphone.	Nen English	Nen	Papua New Guinea	2015-09-10
20150911_01	SNG Word list elicitation		Nambu Nen English	Nambu Nen	Papua New Guinea	2015-09-11

There are 4 quirky features of the minimal metadata spreadsheet at this time:

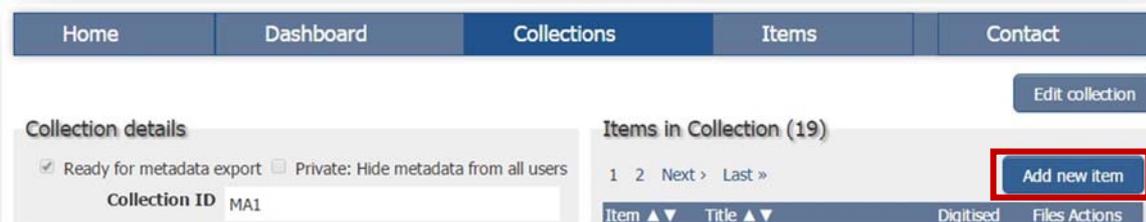

1. You need to type your name as First, Last
2. You must use the language name as it is found in the PARADISEC catalog, based upon those found in Ethnologue (<http://www.ethnologue.com/>), and **NOT** the 3-letter ISO codes. Also, if you have more than one language you'd like to list, you must use a pipe (|) to separate the languages, without any spaces.
3. You must enter the name of the language in full, as it is found in Ethnologue.
4. The year must be of the ISO shape YYYY-MM-DD, including the hyphens.

If your language does not have a code in Ethnologue, chances are we won't have it listed in PARADISEC yet. Contact the CoEDL data manager (julia.miller@anu.edu.au) if this is the case and we will try to address this issue.

Once you have completed filling out your spreadsheet, send it to the CoEDL Data Manager to upload into the catalog on your behalf. Once you can see items in your collection, you can then enrich the metadata of each item directly in the catalog.

DIRECTLY EDIT METADATA IN THE PARADISEC CATALOG:

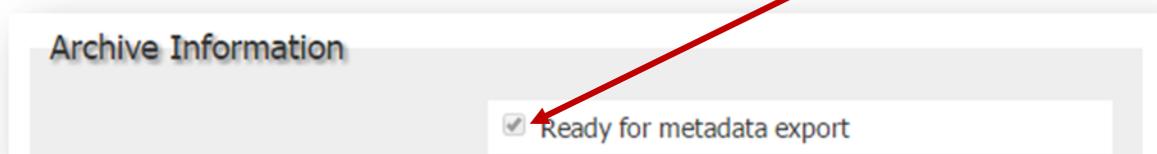

Another way to create an item in your collection, other than via the batch process of the spreadsheet upload, is by entering information directly into the catalog. Go to your collector's dashboard, then click on the **ADD NEW ITEM** button:

If you want to enrich the metadata of items already in the catalog, you can just go to an item in your collection and click on the **EDIT ITEM** button:

When you have finished adding metadata to your items, you must tick the box that says **READY FOR METADATA EXPORT**:

ExSITE9

If you are interested in trying out the Exsite9 program for metadata editing, you can download it from the GitHub site (<https://github.com/IntersectAustralia/exsite9/wiki/Install-packages>). Instructions for use can be found in the [CoEDL Archiving Workflow Guide](#), as well as the following links:

- <http://paradisec.org.au/PARADISEC-ExSite9guidance.pdf>
- <https://github.com/IntersectAustralia/exsite9/wiki/User-Manual>

*After reading through this guide, if you still have questions, or you wish to request a service, feel free to email me (julia.miller@anu.edu.au), or better, visit the **CoEDL Service Request Form**. CoEDL members use the Member login at the bottom of the CoEDL webpage. Then click the General Members tab, the link to the request form is in the left-hand panel. (<http://members.dynamicsoflanguage.edu.au/general-members/job-request/>).*
